WonderBotz PowerPack for Blue Prism Platform gives customers the ability to create better automations faster and with less risk

In joining Blue Prism's Technology Alliance Program (TAP), WonderBotz adds their much sought after WonderBotz PowerPack for Blue Prism Robotic Process Automation (RPA) to speed development of custom solutions, providing the same underpinnings as their popular suite of pre-built solutions for finance and accounting.

WonderBotz PowerPack helps organizations get more from their RPA investments by enabling faster integration of third-party skills and providing accelerators that automate common activities required in many automations as as well as enterprise-scale processing engines and design frameworks.

Making automations better and faster with less risk

Each automation is unique in its entirety, while multiple may need to perform similar tasks such as processing email or converting files. This is why reusability features are included with the Blue Prism Platform and evangelized in their view on Robotic Operating Model (ROM). In our work, we saw ourselves and our clients building similar components to deliver required business value. Sometimes, it was simple functionality that extended an existing object like our Excel Helper. Other times, it was major data manipulation requiring creation of data stores and ad hoc queries like our Data Aggregation Engine.

We asked ourselves, 'what if we set out to maximize reusability?' and started building a toolkit aligned to our design and configuration standards. This vision grew into the WonderBotz PowerPack. We quickly realized that we could build bigger and more valuable automations much faster and that testing was easier because the automations just worked. We didn't stop there. We kept adding functionality like our data quality engine to fix common OCR errors. Our clients saw the value too and appreciated the ability to tackle more challenging automations in shorter timeframes.

As we demo the PowerPack functionality, sometimes clever developers would take notes and later try replicate the work only to find themselves versions behind us. Ultimately, our clients just asked if we would license the PowerPack to them. We know a great idea with broad appeal when we hear one and set out to create a shareable version.

The WonderBotz PowerPack works with Blue Prism platform. It's a shortcut to powerful building blocks that enables new developers to deliver like seasoned pros and makes experienced developers more productive. We're actively adding accelerator and processing engine functionality based upon feedback and our own successful client projects.

WonderBotz PowerPack is easy to use

As the pioneer of the most robust, secure, and highly scalable Digital Workforce, Blue Prism's focus is on delivering an agile workforce that follows rules-based business processes and interacts with systems in the same way human users do – and that complements both traditional and leading edge IT solutions such as business process management (BPM), OCR, AI, machine learning, and front- and back-office productivity tools.

As a leading RPA service provider and recipient of Blue Prism's prestigious 2019 Total Solutions Provider, WonderBotz is an expert at enterprise-scale intelligent automation. We know how to enable and mentor clients, and conceive, build and run solutions for maximum speed-to-value. Our PowerPack is one of our key tools in serving clients and we've made it easy to use for client developers. Once installed, the assorted helpers and engines are available to drop and drag into your automations.

What's included

The WonderBotz PowerPack adds invaluable functionality to the Blue Prism Platform, building upon and extending its features and functionality.

For example, our Collection Helper includes string search, find and/or removal of duplicates, and checks for whether the collection is empty. Our Excel Helper includes pivot table manipulation, formatting, and filtering functionality. The list of functions is below.

Helpers		Engines
• Acrobat Helper • Excel Helper • Outlook Helper • Queue Helper • HTML Helper • Word Helper • XML Helper • Online Post Office • Helper	• Screen capture Helper • String Helper • Address Helper • File management Helper • Collection Helper • Credential Helper • Configuration management Helper • SQL Helper	• Data Aggregation • Data Prep • Data Cleansing • Dashboard • PLE Controller (external parameter and logic file) • Data Packaging • Email Handler • Alerts/Notifications • Matching • 'Loose' Rules • Document Processing

Summary

Blue Prism and WonderBotz are a perfect pairing. The Blue Prism platform provides easy access to "drag-and-drop" functions and WonderBotz provides an invaluable toolkit with commonly needed functions driving faster speed-to-value and enabling your developers to produce automations like seasoned professionals regardless of their experience levels
