

Blue Prism & Information Builders: Accelerate Digital Transformation with Process Automation

The explosion of data from sensors, mobile devices, files, applications, emails, data warehouses, and IoT connected devices forces businesses and governments to creatively and proactively leverage technology for digital transformation and business agility.

Robotic Process Automation (RPA) and business-based analytics maximize the value of data by transforming it into actionable information for improved decision making with automated processes for increased efficiencies.

Maximize trusted data, analytics and process automation for faster innovation and bigger growth.

RPA generates and gathers data that allows companies to analyze and act on advanced metrics. As a result, organizations can streamline business processes, monitor operating performance and quickly achieve specific benchmarks and goals.

Blue Prism's intelligent digital workforce enables automation orchestration across all corporate applications and systems in a continuous feed.

The Information Builders (IBI) data and analytics platform provides a complete data management solution with the ability to consolidate, reconcile, cleanse, master and analyze data, formatting and transforming it into actionable, visual analytics.

CHALLENGE

How to improve quality of operations for faster innovation, enhanced decision making and operational intelligence.

SOLUTION

An integrated solution that enables business agility and strategic outcomes through intelligent automation, augmented analytics and data management.

BENEFITS

- Connect to all systems, databases, files & applications.
- Cleanse & master data for trusted, reliable analytics.
- Securely automate processes increasing efficiency & productivity.
- Empower a digital workforce to interpret, respond and collaborate with systems & people.
- Replace routine, error-prone work with value-added activity.

Information Builders & Blue Prism RPA: Better Together

Speed digital transformation with trustworthy data and access to visualizations.

IBI and Blue Prism deliver an intelligent digital workforce that operates autonomously. Unattended process automation speeds digital transformation and decision making for any industry.

Blue Prism RPA performs a massive amount of operations from desktop, machine, sensor, and cloud environments. Additional digital workers can be deployed quickly with minimal costs, according to work flux, demand, and performance.

Together, we offer an integrated, end-to-end, scalable solution that saves time and money while increasing process efficiency.

Organizations can expect to achieve the following enterprise benefits:

- Build and deploy automations to improve both the productivity and quality of operations.
- Measure, report & align RPA operations with strategic business outcomes.
- Define, track, measure & share process KPIs that quantify the value and impact of automation strategy.
- Share dashboards, monitor key performance indicators (KPIs), get push notifications of critical events, and use predictive analytics to forecast future states and milestones.

Achieve operational intelligence through augmented analytics and data management.

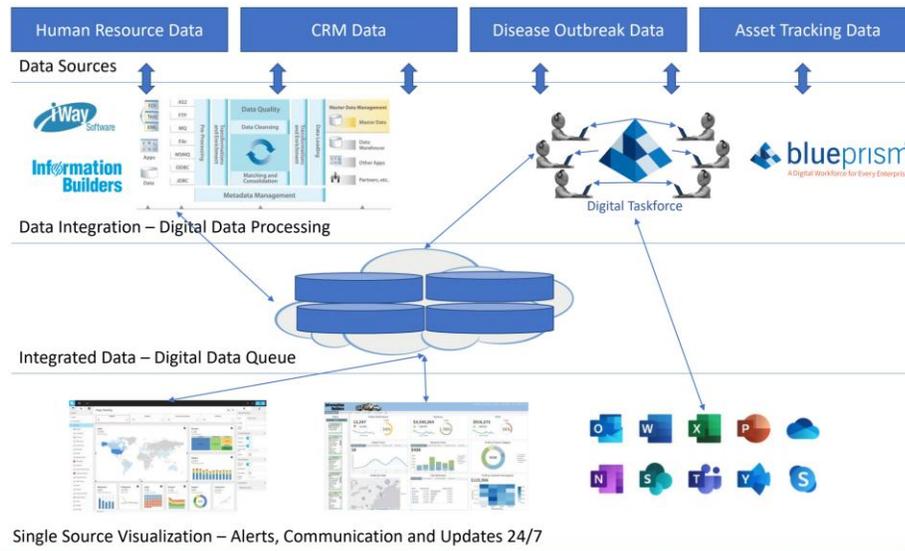

Use Case: Improving Logistics and Personnel Deployment During a Crisis

Multiple tracking systems and data sets make it tough for federal departments to get a common operating picture during a crisis. The challenge lies in getting logistic and personnel placement to areas quickly and accurately.

Information Builders and Blue Prism designed an automated, end-to-end solution that can identify, deploy and track logistics and personnel during the Coronavirus outbreak, enabling government to respond safely, securely and at scale, all without human intervention.

The solution utilizes a digital workforce to perform mapping exercises and critical mission support in hard hit COVID-19 regions, saving countless hours while ensuring error-free deployment, order processing and management.

How the Joint Solution Works

The integrated solution leverages Blue Prism, OmniGen and WebFOCUS to provide:

- Digital Intelligence Tracking
- Automated personnel, resource deployment, order processing & tracking
- Personnel validation & health check

Additional Verticals where this solution can be deployed: Financial Services, Insurance, Healthcare, Logistics, Supply Chain, Manufacturing, Hospitality.

Summary

Organizations can now capitalize on trustworthy data, analytics, and process automation as the foundation for innovation, growth, responsiveness, and digital transformation. Automate at a fraction of the cost and time previously encountered, while using your existing infrastructure without disrupting underlying systems—which would be difficult and costly to replace.

With Blue Prism and Information Builders, an extensible, scalable and flexible solution ensures strategic operational and business predictability.

- ✓ Build and deploy automations quickly and easily, improving productivity, quality of operations.
- ✓ Measure, report, and align RPA operations with strategic business outcomes.
- ✓ Define, track, measure and share process KPIs to measure value and automation strategy.
- ✓ Achieve operational intelligence through augmented analytics and data management.
- ✓ Share dashboards, monitor key performance indicators (KPIs), get push notifications of critical events and use predictive analytics to forecast future states and milestones.

About Information Builders

Information Builders is the leading data and analytics company. We help organizations operationalize and monetize their data through insights that drive action. Our integrated platform for business intelligence (BI), analytics, data integration, and data quality, combined with our proven expertise, delivers value faster, with less risk. We believe data and analytics are the drivers of digital transformation, and we're on a mission to help our customers capitalize on new opportunities in the connected world.

About Blue Prism

Blue Prism's vision is to provide a Digital Workforce for Every Enterprise. The company's purpose is to unleash the collaborative potential of humans, operating in harmony with a Digital Workforce, so every enterprise can exceed their business goals and drive meaningful growth, with unmatched speed and agility. Available on-premises, in the cloud, hybrid, or as an integrated SaaS solution, Blue Prism's Digital Workforce automates end-to-end processes that drive digital transformation. Visit www.blueprism.com to learn more about Blue Prism (AIM: PRSM).
