

Create Process Definition Documents (PDDs) Quickly and Accurately

Reduce time-to-automation by as much as 10%.

WHAT IS BLUE PRISM CAPTURE?

Blue Prism Capture is an intelligent process capture platform that combines task extraction and computer vision to autogenerate all key components of a PDD from a process owner demonstration.

WHY CHOOSE BLUE PRISM CAPTURE?

Blue Prism Capture automatically generates process flows, definitions, screenshots, and all of the other supporting information needed to create and optimize PDDs quickly and accurately with less risk. You'll even be able to perfect each step within the process using the step editor, add extra steps, branch steps, and branch conditions. In the end, you can export an optimized and accurate PDD, ready for use as a skeleton for future developers.

FUNCTIONALITY

Capture

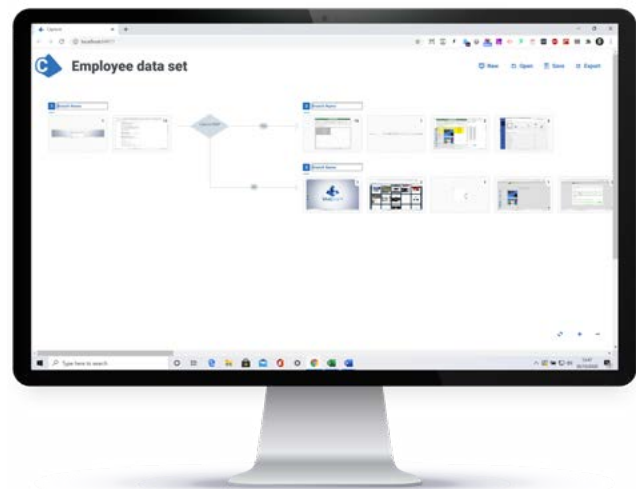

Automatically capture each step of the process, from a process owner demonstration.

Review and Edit

Review the process map and individual steps to ensure the process is reflected at the desired detail.

Export

Extract your PDD in MS Word and other file formats.
