

# identitii's Overlay+ & Blue Prism

Intelligent, secure and trusted data exchange

Overlay+ is revolutionising financial messaging with key features that address the biggest pain points of the financial industry. It combines a private blockchain and tokenisation with Robotic Process Automation from Blue Prism to deliver a secure, auditable and timestamped record of information gathered via Blue Prism's workflows.

- ✓ Provide a secure and permissioned data layer on top of existing technology infrastructure to enable the sharing of customer and transaction-related documents and information.
- ✓ Enable timestamping and verification of activity to establish a provable history of document contents and workflows.
- ✓ Deliver a tamper-proof audit trail of rich-information that can be expanded, searched, permissioned and securely shared with internal teams or external organisations.

## Features

- Private blockchain
- Tokenisation
- Robotic Process Automation (RPA)
- Tamper-proof audit trail
- Seamless integration
- Suite of API's
- Customisable interfaces
- Unified view of data in an end to end timeline
- Structured data exchange
- Enterprise search
- Overlay+ email plugin to Microsoft Outlook
- Other API integrations including Dow Jones Risk and Compliance and Canon Iris OCR

OVERLAY+  
+  
blueprism®

## How it works

---

### Transparent and auditable robotic process automation

Overlay+ creates an unalterable timestamp of any data element collected via Blue Prism's RPA workflows to ensure data provenance and auditability. Overlay+ aggregates digital RPA actions and information retrieved by RPA into an end-to-end timeline view that provides fast and initiative access to information.

### Intelligent and secure data exchange

Blue Prism's robotic process automation retrieves historically hard to acquire information from legacy systems in near real-time. Overlay+ ensures that information is securely collected and shared by replacing sensitive data retrieved by Blue Prism's RPA with unique identifiers, called identitii tokens, which are saved on identitii's private blockchain and exchanged either internally or with external counterparties. identitii tokens retain the essential information about the data without compromising its security.

### Tamper-proof Audit Trail

The Overlay+ private blockchain uses controlled access to keep data secure, with only permissioned parties gaining access. Timestamping establishes a provable history of document contents and information. Recording all activities on a decentralised ledger, provides assurance that information and documentation have not been modified, forged or backdated.

## Deployment

---

Overlay+ is an application layer that works on top of existing or emerging networks and systems. It has a suite of APIs and can be deployed on premise or via the cloud.

## About Blue Prism

---

As the pioneer, innovator and market leader in Robotic Process Automation (RPA), Blue Prism (AIM: PRSM) delivers the world's most successful Digital Workforce with software robots that automate repetitive administrative tasks and meet the requirements of the most demanding IT environments.

Blue Prism provides a scalable and robust execution platform for best-of-breed AI and cognitive technologies and has emerged as the trusted and secure RPA platform of choice for the Fortune 500.

## About identitii

---

Identitii Limited (ASX:ID8) enables financial institutions and corporates to securely verify and share transaction level detail between counterparties. Its flagship platform uses blockchain technology to create an unalterable audit trail of activity simplifying KYC and financial crime compliance, payments, cash management, document management and standards adoption for financial institutions and corporates, and their counterparties. Founded in 2014, Identitii is a publicly traded company, having undertaken an IPO on the ASX in October 2018, raising \$11 million. Identitii Ltd. is headquartered in Sydney, Australia.
