

MuleSoft & Blue Prism RPA: Building Bridges that Accelerate True Digital Transformation

To keep pace with increased competition, businesses today need smart technologies that make it easy to deliver seamless, connected experiences to customers, employees and partners. While digital transformation is top of mind, many businesses still rely on legacy systems and proprietary applications to support mission critical processes, creating barriers to connectivity and decreased productivity.

Building on the strength of both offerings, Blue Prism is partnering with MuleSoft, the leading API integration platform, to make it easier for organizations to digitally transform by connecting APIs to intelligent digital workers. Companies now have easy, secure access to front and back office automation to improve process performance, reduce costs and drive operational efficiency.

This integration adds **Knowledge & Insight** and **Collaboration** skills to Blue Prism RPA, creating an intelligent Digital Workforce that enables the AI-powered automation needs of any organization.

Deploy Intelligent Automation in a Faster, More Controlled Way

MuleSoft's Anypoint Platform helps organizations synchronize data and support workflows by providing connectivity across enterprise applications. The MuleSoft platform speeds up and improves the app development process by unlocking siloed data for a connected customer experience, while maintaining governance and security throughout the process. MuleSoft's API-led connectivity approach enables a connected experience and fast app development.

MuleSoft and Blue Prism make it simple for businesses to deliver innovation at scale by deploying enterprise grade intelligent automation in a faster, more controlled fashion. Together, the joint integration helps you:

Extend the Reach of the Anypoint Platform & MuleSoft Application Networks. Blue Prism's intelligent digital workforce integrates easily with legacy and new IT systems, extending the reach of MuleSoft to legacy applications that have no APIs. This enables MuleSoft to expand application networks securely and in a fully auditable and compliant way. With pre-built connectors, it's easy to accelerate front and back office automation in conjunction with MuleSoft.

Add value to your automation journey. MuleSoft can access the power of Blue Prism's intelligent digital workforce by leveraging Blue Prism's Process Dispatch Framework. This allows for discovery of all processes in a Blue Prism environment, acting as an intermediary to enable webservices. Connectivity happens asynchronously and in an integrated MuleSoft environment. Together, Blue Prism + MuleSoft help you connect and automate quickly, securely and without delay.

Here's How it Works

An integration platform, MuleSoft helps developers connect applications together quickly and easily, enabling them to exchange data. However, when a platform lacks integration capabilities, or the target data needs to be generated through a series of transactions, Blue Prism and connected RPA are crucial.

Technology Alliance Program

SOLUTION BRIEF

Blue Prism delivers a robust, secure, agile, and highly scalable digital workforce that follows rules-based business processes with built-in compliance capabilities and governance.

By sending a webservice call to initiate a discrete task or

a complete end-to-end process, businesses can quickly and easily integrate with and automate legacy systems. Whether it's invoicing, insurance claim handling, password setting or any other process, the joint solution removes barriers to digital transformation making it faster and more efficient to automate mission critical systems in a sustainable, scalable way.

Enterprise Benefits

- Connect to all enterprise systems, both with APIs and without APIs.
- Create a unified view of your application network, including legacy systems, fully auditable & compliant.
- Use pre-built MuleSoft connectors to automate quickly, securely and without delay.
- Improve depth and breadth of automation initiatives to support broader digital transformation.

Together, MuleSoft and Blue Prism drive true enterprise digital transformation that delivers on the promise of seamless, efficient, connected experiences through powerful automation for sustainable business value and undeniable ROI.

About Blue Prism

In this digital era where start-ups are constantly disrupting markets, only the most agile and innovative enterprises survive and thrive. At Blue Prism, we pioneered Robotic Process Automation (RPA), emerging as the trusted and secure intelligent automation choice for the *Fortune 500* and public-sector market. Now we bring you connected-RPA supported by the Digital Exchange (DX) app store—marrying internal entrepreneurship with the power of crowdsourced innovation.
