

Workshops

Surface Automation

The hands-on training that will ensure your developers build resilient automations that handle changes to the surface layer.

What is a Success Workshop?

Our workshops are role-based, hands-on training sessions that cover the most popular skills Blue Prism users need. They are delivered as described herein or customized to meet specific requirements of your team. Facilitated by a certified Blue Prism expert, your team is trained and guided in a private course dedicated to their success.

Why choose Surface Automation?

This workshop is for the developer who needs to leverage Blue Prism to build and deploy surface automations. These types of automations bring a certain level of increased difficulty because it's highly likely that objects will move over time – building the right type of surface automations assured they won't break when this happens.

What to expect:

- Instructor-led customized training leveraging the University courseware
- Customer use case used as basis for all hands-on exercises
- Surface Automation Overview
- New Application spying mode
- Regions
- Character Matching
- Send Keys
- Image Recognition

VALUE AND OUTCOMES:

- Instructor-led, hands-on guided training sessions
- Open and fluid exchange of ideas and lessons learned.
- Social interaction with other teammates during training
- Improved uptake of skills during the training session
- Faster response to student questions and direct instructor feedback on skill application

Course Delivery Options:

- This is a 1-day workshop
- Can be delivered virtual or onsite at your offices
