

Blue Prism Process Intelligence Powered by ABBYY Timeline

Best in Class Process and Task Mining Meets Best in Class Automation

ABOUT

Deeply Integrated Process and Task Mining to Scale Automation Quickly

Building on a strong partnership, Blue Prism and ABBYY now make available a single, unified solution that delivers deeply integrated, a best of breed process and task mining offering that delivers more value from automation in less time.

CHALLENGE

A digital transformation initiative is complex and overwhelming; it requires fast, actionable insight. You must understand what should be automated, it takes a lot of time to build and deploy automations, and ongoing automations might still encounter exceptions or deviations.

SOLUTION

Blue Prism Process Intelligence is a unified solution that deeply integrates best of breed process mining, task mining, and intelligent automation to deliver automation value.

- Over 20 numerical analyses handle complex, variable, and less-common case-based processes
- Data is ingested and standardized quickly using Extract-Load-Transform (ELT)
- Alerts for exceptions and deviations keep processes running smoothly

BENEFITS

This integration accelerates time to discover, design, and deliver enterprise-scale automations, furthering digital transformation investments:

- Rapid identification of automation candidates
- Faster time to automation value
- Continuous monitoring to flag exceptions and deviations
- Zero risk to get started fast

USE CASE

Higher Value Automation for Improved Business Results

Across industries and business processes, Blue Prism combined with ABBYY Digital Intelligence solutions enable Blue Prism digital workers to provide higher value of automation for improved customer experience and business results.

- Finance & accounting (invoices, purchase orders, sales orders)
- Financial services (KYC / AML, mortgage lending, opening accounts, trade confirmation)
- Insurance (claims, policy administration, opening accounts)
- Healthcare (patient registration and onboarding, resource planning)

**ENTERPRISE
 BENEFITS**

1. Discover more processes to automate, including variations, and use insight to make a business case for digital transformation.
2. Get value from automations faster by using unified process mining, task mining, proprietary ELT technology, Blue Prism Capture, ALM, and Design Studio.
3. Optimize all processes, not just automations, to run at peak performance, maintaining compliance and SLAs and proving return on investment.
4. Get started quickly with multiple deployment options and a single procurement pathway.

**HOW IT
 WORKS**

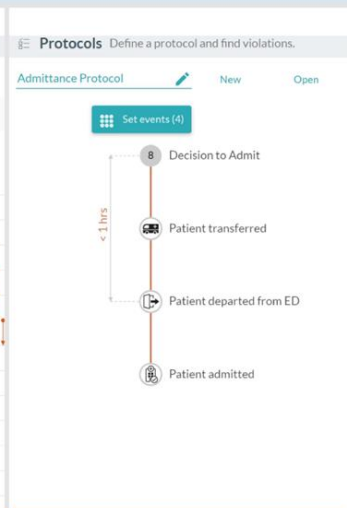

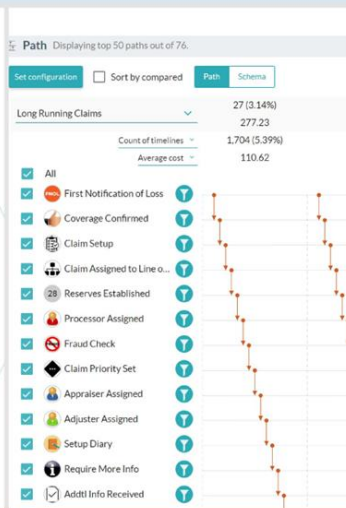

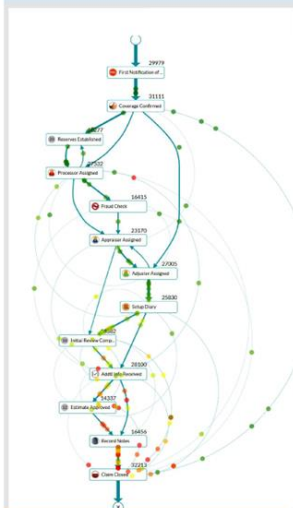

Process and Task Mining to Automation in Just a Few Clicks

What is my process >

How are my processes performing >

Are my processes compliant >

What is going to happen in the future >

PREDICT FUTURE PROCESS OUTCOMES

Are we at risk of missing a critical SLA?
 Is this service request going to require a part?
 Will this account need to be referred to collections?
 Will this customer abandon the purchase process?

Process Discovery

Analysis & Optimization

Real-time Monitoring and Alerting

Predictive Intelligence

- ✓ Visualize the flow of work through process stages to see delays, bottlenecks and outliers.
- ✓ Gain insight into “as-is” customer processes. Understand challenges and discover special cases to improve customer satisfaction.
- ✓ Drive down cost of process evaluation to identify high value improvement opportunities.
- ✓ Eliminate manual process evaluation and deliver faster time to value on process improvement initiatives.
- ✓ Receive alerts when rules are broken and follow up immediately to ensure it won't happen again.
- ✓ Automatically monitor performance in near real time, trigger remediation processes, or RPA technology.

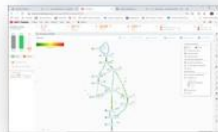

SUMMARY

Blue Prism Process Intelligence Powered by ABBYY Timeline offers tight integration between process mining, task mining, and intelligent automation.

- Streamlines the customer journey so organizations can go straight from process mining to Blue Prism Capture, then bring it all into Blue Prism Design Studio.
- Process Intelligence to identify, design, implement, and monitor RPA initiatives to realize the greatest return on investment.
- Automatically monitor process performance and triggering remediation processes throughout the entire automation life cycle.

ABOUT BLUE PRISM

Blue Prism's vision is "A Digital Workforce for Every Enterprise." The company's purpose is to unleash the collaborative potential of humans so every enterprise can exceed business goals and drive meaningful growth.

Available on-premises, in the cloud, hybrid, or as an integrated SaaS solution, Blue Prism's digital workforce automates end-to-end processes that drive digital transformation.
