

Build Quality Assessment

The right combination of scrutiny, shadowing, and guidance to ensure high performing automations.

The Build Quality Assessment is a deep dive into configured processes to evaluate how well best practices have been leveraged so you can be confident that your processes are robust, resilient, and reusable.

What is the Build Quality Assessment?

The Build Quality Assessment evaluates your processes and VBO objects against benchmarks and best practices to uncover areas that may be hindering performance. It provides a framework to improve delivery time and digital worker utilization.

Why Build Quality Assessment?

With the Build Quality Assessment, we deep-dive and leverage the Blue Prism recommended approaches for building efficient, robust, and reusable solutions to guide your team to achieve even more and move to the next level.

What to expect:

- A thorough evaluation of up to two end-end configured processes.
- Analysis on the use of recommended best practices for the design and build of automations.
- Analysis on the use of VBO and reusable objects, as well as assets available from Blue Prism on the Digital Exchange
- Detailed readout of specific areas that need to be addressed to unlock value, reduce delivery time, and drive efficiency.
- A workshop to walk through the findings and create a strategy to act on the findings.

VALUE AND OUTCOMES:

- Better design decisions.
- Improved design and build methods to deliver more robust processes.
- Alignment to best practice for efficiencies, stability, and resilience.
- Recommendations for process automation enhancements and performance improvements.
- Training plans to upskill your team.
- Steps to move your program forward and take on more complex intelligent automation development.
