The Power of Intelligent Automation & AWS Cloud

Automation Services on AWS

Accelerate success and scale within your intelligent automation journey.

Platform

Robot as a Service (RaaS)

A Cloud as-a-Service deployment of automation technology combines Blue Prism on AWS so companies can start building and running automation applications and services in the cloud today.

Expert Team

Team as a Service (TaaS)

Start your automation initiatives with a complete automation team to support your program from day one. Leverage the team as an extension to your internal organization or to get started while you build up internal capacity.

Use Cases

Pre-Built Use Cases

Pre-built use cases leverage Blue Prism and AWS machine learning and artificial intelligence tools.

Training Platform

INVOKE Training

Designed to support your team through the different stages of your automation journey, from initial process discovery to implementation, your team will be trained by expert practitioners.
