

SQL Server Assessment

The fastest way to evaluate the reliability, performance, and security of your SQL database.

With SQL Server Assessment you'll be sure to have a solid database configuration that's built for long-term success, and able to support your growing demands seamlessly. For new customers, this service ensures optimal performance and longevity from the onset of your journey.

What is SQL Server Assessment?

The experts at Blue Prism will do a deep-dive analysis of your SQL Server to ensure that it has been configured for optimal performance, backup & recovery, security, and administrative procedures.

Why Choose SQL Server Assessment?

It's important to deploy a highly available, performant, quickly recoverable, and secure database when running process automations. Otherwise, you're likely to risk loss of service, poor control room experiences and trouble scaling efficiently.

What to expect:

- **MONITOR** – Blue Prism's experts will work with your staff to monitor key settings and metrics.
- **ANALYZE** – We'll use a series of proven KPIs to analyze the data collected about the current state of your SQL Server.
- **IMPLEMENT** – We'll offer best-practice guidance for improving any inefficiencies we may uncover and help you implement those changes.
- **REVIEW** – Once the recommended changes are implemented, we'll compare the new current state against your old current state so you can see the benefits realized.

VALUE AND OUTCOMES:

- Reliability
- Performance
- Monitoring
- Security
- Reporting
