

# Technical Architecture Design Assurance

The actionable advice and quality assurance your intelligent automation infrastructure can stand on.

The Technical Architecture Design Assurance is a thorough inspection of the technical strategy, architecture design and implementation that underpins your intelligent automation program.

## What is the Technical Architecture Design Assurance?

The Technical Architecture Design Assurance evaluates your tech-stack and related hardware and software architectural design and strategy to ensure you have what you need today, as well as create a model to grow successfully as your program scales.

## Why Technical Architecture Design Assurance?

The Technical Architecture Design Assurance is a deep-dive with your team to ensure you are on a solid foundation to deliver upon the business goals and minimize unforeseen risks that may arise related to the technical infrastructure design. It is extremely valuable as you plan to move to an upgraded environment to maximize the use of new features.

## What to expect:

- A thorough evaluation of the architecture design and implementation of your software.
- Identification of the most appropriate infrastructure strategy for your program both today and over the next 12-18 months.
- Analysis on the stability of the infrastructure and identification of risk areas.
- Advise and support for the right technical architecture design to support the program's objectives.

## VALUE AND OUTCOMES:

- Support for High-level RPA Technical Infrastructure Design
- Technical Architecture Workshop
- Evaluation and identification of the appropriate implementation and operational methodologies.
- Proven risk mitigation strategy
- Detailed readout of areas that need attention and risk mitigation strategies to be considered.
- Expert guidance on the best infrastructure to support the program expansion over time.
- Go-Live support
