

Blue Prism Version 7

Unifying the Workforce!

The enterprise of tomorrow needs a secure digital workforce that scales easily and quickly to increase productivity, enhance customer service, and stay ahead of the competition. Furthermore, your human workforce needs the ability to effectively orchestrate their digital co-workers. Additionally, digital workers need capabilities and skills that make them smarter and give you a true enterprise grade intelligent digital workforce.

Automate Your Future with Version 7

Blue Prism Version 7 puts the power of scalability and control in your hands. Build a digital workforce that scales faster than ever, easily manage it, and flexibly support your digital transformation strategy.

The browser-based control interface gives you dashboards and data views to track automation health, and with an expanded API framework, offers you greater customization too.

Reimagine what's possible:

Version 7 was designed to realize your automation goals and achieve the best return on investment.

- **Increase Efficiency:** Version 7 lets you grow your digital workforce and scale more than ever to meet your expanding enterprise demands. With multiple digital workers able to gather to address peak demand, customer resolution time is significantly improved.
- **Automate to Your Advantage:** Create automation workflows so your human employees are free to do higher value work. Tailor workflows and control your workforce by allocating more (or less) digital workers based on business needs.
- **Future Proof Your Automation Ecosystem:** With Blue Prism at the heart of your automation ecosystem, your digital workers can easily access and connect all your current and future business systems.

Blue Prism Version 7 includes:

- **(New) Blue Prism RESTful API** – Programmatically monitor, control, and manage your digital workforce with APIs and add plug-in innovation through a complementary technology ecosystem.
- **(New) Browser-based Control Interface** – Quickly assess dashboards and data views that show the health of your digital workforce. Empower your human workers with data insights at a glance, and the power to orchestrate your digital workers easily and effectively.
- **(New) Native Citrix Automations** – Design and deliver more robust automations that interact with applications running on a Citrix Desktop as if they are running locally.
- **Design Studio** – Drag-and-drop process automation building, create an inventory of reusable automation objects and processes to deploy as needed.
- **Digital Workers** – Train your autonomous digital workforce to take on increasingly complex tasks and deploy them across your business wherever and whenever they're needed most. Fuel their decision-making skills by integrating AI, machine learning and OCR capabilities from the [Blue Prism Digital Exchange](#).
- **Control Room** – The human workforce requires the ability to effectively orchestrate digital co-workers and seamlessly collaborate with them, as well as other business systems.

Secure development policy

As part of our secure development policy, Blue Prism products are evaluated against the following security standards:

- **OWASP Top 10** – The security vulnerabilities that pose the most risk to applications development. [Further information](#)
- **SANS CWE Top 25** – The most common software security vulnerabilities found throughout the software development industry. [Further information](#)
- **Federal Information Processing Standard (FIPS) Publication 140-2** – U.S. government standard that defines minimum security requirements for cryptographic modules in information technology products.
- **Payment Card Industry Data Security Standard (PCI DSS).**
- **Health Insurance Portability and Accountability Act (HIPAA).**
- **Federal Information Security Management Act (FISMA).**

blueprism®

Blue Prism is the global leader in intelligent automation for the enterprise, transforming the way work is done. At Blue Prism, we have users in over 170 countries and more than 2,000 businesses, including Fortune 500 and public sector organizations, that are creating value with new ways of working, unlocking efficiencies, and returning millions of hours of work back into their businesses. Our intelligent digital workforce is smart, secure, scalable and accessible to all; freeing up humans to re-imagine work.
